

**TAPER FLANGE CHANNEL | SANS 50025 / EN 10025 S355JR**

Taper flange channels are made from hot-rolled steel. They have right angle flanges on each side with a flat, wide surface. It has an outer edge which is sharply angled. The inner surface thickness reduces from the web to the end.

**Product application**

Channels are often used in construction projects as supports.

**Mass per metre (kg/m)**

Size	Kg/m	Web dimensions (mm)	Flange dimensions (mm)	Height (mm)	Width (mm)
76 x 38	6.700	5.100	6.800	76.200	38.100
100 x 50	10.727	6.000	8.500	100.000	50.000
120 x 55	13.546	7.000	9.000	120.000	55.000
127 x 64	14.926	6.400	9.200	127.000	63.500
140 x 60	16.223	7.000	10.000	140.000	60.000
152 x 76	17.911	6.400	9.000	152.400	76.200
160 x 65	19.122	7.500	10.500	160.000	65.000
178 x 54	14.546	5.800	8.400	177.800	54.000
180 x 70	22.265	8.000	11.000	180.000	70.000
200 x 75	25.400	8.500	11.500	200.000	75.000
